

Key Personnel Qualifications

The contractor shall provide personnel who are fully qualified and competent to perform the full range of tasks described in the SOW. The desired qualifications for key personnel under this contract are stated below.

1. Position Title: Program Manager

Education:

- a. A bachelor's degree in math, science, computer science, or engineering.
- b. A master's degree in business administration.

Experience per Individual:

- a. Six years experience in managing the work efforts of at least eight personnel in the specialized field of endeavor for which this person will be responsible. Four years of additional experience may be substituted in lieu of the degree. This experience should include the following areas: supervision; task management; cost estimating; developing Plan of Action and Milestones (POA&M) or Work Breakdown Structures (WBS); safety/security; cost efficiency programs, practices, and procedures; and quality assurance.
- b. Experience with naval afloat programs.

2. Position Title: Software Engineer

Education:

- a. A bachelor's degree computer science, information system, or equivalent.
- b. MCSE Certification

Experience per Individual:

- a. Four years experience in the installation, setup, configuration and troubleshooting of UNIX (including HP10.20 and Sun Solaris) Operating Systems.
- b. Four years experience in the installation, setup, and configuration of MS Windows NT based servers and workstation, including associated Sever applications (MS Exchange, SQL, Proxy, and IIS)
- c. Experience with naval information systems and shipboard network administration.

3. Position Title: **Network Systems Analyst**

Education:

- a. An associate degree in information systems or equivalent
- b. MCSE certification
- c. CISCO router and switch certification

Experience per Individual:

- a. Two years experience in the installation, configuration, and troubleshooting of Ethernet and ATM based LAN's including switch based architectures.
- b. One year experience in the router and switch configuration.
- c. Experience with naval information systems and shipboard network administration.

4. Position Title: **Senior Installation Technician**

Education: An associate degree in technology or the equivalent military schools.

Experience per Individual:

- a. Eight years experience in the AIT installation of shipboard electronic systems. This experience should include the following areas: preparing planning documents such as Work Breakdown Structures and Plan of Action and Milestones for executing installations from initiation to completion; leading/managing installation efforts; interfacing with military and civilian personnel; performing system level testing, fault isolation, and repair; providing on-the-job training on equipment/system operation to shipboard personnel; and using shipboard installation standards.

5. Position Title: **Senior Field Technician**

Education: An associate degree in technology or the equivalent military schools.

Experience per Individual:

- a. Eight years experience in the test, inspection, and repair of shipboard electronic systems. This experience should include the following: leading/managing test and inspection efforts; interfacing with military and civilian personnel; performing system level testing, fault isolation, and repair; providing on-the-job training on equipment/system operation and maintenance to shipboard personnel; debriefing test results to ships force and other cognizant personnel.
